& AUTISM CENTRE

About Us

Small Wonders Centre for Child Development is a multi-disciplinary intervention clinic and autism centre for children with developmental delays, neurological disorders and learning disabilities.

This paediatric specialty centre offers world-class services in the field of speech and language therapy, occupational therapy, physiotherapy, behaviour therapy, counselling, sensory integration therapy and remedial education.

Our Services

- Speech & Language therapy
- Occupational Therapy
- Physiotherapy
- Behaviour Therapy
- Counselling
- Remedial Education

Our Approach

We follow internationally researched and evidence-based practices, thoughtfully adapted to each child's unique needs helping them improve their abilities in a comfortable and supportive setting.

Our Team

A strong team of qualified trainers and highly skilled therapists, pathologists and special educators work together to provide personalised and comprehensive care.

Our Commitment

We provide exceptional therapy quality, total parent involvement and a warm safe and nurturing environment for children with special needs.

OCCUPATIONAL THERAPY

Paediatric occupational therapists help children gain independence while strengthening fine motor, sensory motor and visual motor skills needed to function and socialise. They address sensory-processing issues, equip parents to manage behavioural struggles and use specialised approaches to maximise a child's engagement, acheivement and independence in daily activities, including at school, play, leisure and self-care skills such as dressing and feeding. We work with babies, children and teenagers up to the age of 18, analyse why a child may be struggling with specific tasks, and devise a bespoke treatment plan.

We Treat For

- Sensory processing/integrative disorder
- Developmental coordination disorder
- Developmental delay
- Autism pervasive developmental disorders
- Learning problems or Disability
- Down syndrome and other syndromic conditions
- Juvenile rheumatiod arthritis
- Orthopedic problems
- Birth injuries/birth defects
- Spina bifida
- Hydrocephalus
- Other neurological deficits
- Cerebral palsy and chronic illnessess
- Truamatic injuries (brain or spinal cord)

What Can Be Accomplished Through OT

Improving fine motor skills so children can grasp and release toys and develop good hand writing skills.

Addressing hand-eye coordination to improve kids play and school skills (hitting a target, batting a ball, copying from a blackboard, etc.)

SPEECH LANGUAGE THERAPY

OUR PROGRAMME

Our team of Speech Lnaguage Pathologists (SLPs) assess, diagnose and treat speech, language, social communication, cognitive-communication and swallowing disorders in children and adults. We follow evidence-based practices with a distinctive, experiential and integrated approach to bridge communication difficulties in a safe and supportive envvironment.

Communication Difficulties We Address

Speech Disorders

Difficulty producing speech sounds correctly or fluently, or problems with voice or resonance.

Language Disorders

Difficulty understanding (receptive) or expressing thoughts, ideas and feelings (expressive); may involve form, content and/or use of language.

Social Communication Disorders

Difficulty with the social use of verbal & nonverbal communication, eg: greeting, commenting,asking questions,adapting to the listener and setting and following rules for conversation & storytelling.

Cognitive-Communication Disorders

Difficulty organizing thoughts, paying attention, remembering, planning & problem-solving.

Swallowing Disorders (Dysphagia)

Difficulty understanding (receptive) or expressing thoughts, ideas and feelings (expressive); may involve form, content and/or use of language.

We Provide Intervention for Speech Disorders

- Childhood Apraxia of speech
- Dysarthria
- Orofacial Myofunctional Disorders
- Speech Sound Disorders
- Fluency Disorders- Stuttering & Cluttering
- Voice Disorders

BEHAVIOURAL THERAPY

Behaviour therapy tends to look at specific, learned behaviours and how the envvironment influences those behaviours. It does not involve one specific method but uses a wide range of techniques that can be applied to a child's psychological problems.

We Treat For Children

- Socially significant behaviour
- Personally important behaviour
- Academically relevant behaviour
- Reducing excess and harmful behaviour
- Behaviour required to learn all over behaviour

Applied Behaviour Analysis

Appiled Behaviour Analysis (ABA) is one of the oldest and most effective methods of understanding and modifying a child's behaviour and improving their social and emotional conduct.

It is a kind of behaviour therapy used extensively with autism spectrum disorders. Once a child is diagnosed with autism, ABA is one of the most common therapies used.

Remedial Special Education

Remedial education is a compensatory or preparatory education assigned to assist students in order to achieve expected competencies in core academic skills. It is designed for any type of students, with or without special needs. Whereas special education is the practice of educating students with special needs in a way that addresses their individual differences and needs.

Why Special Education May Be Needed ?

Special materials, special training techniques, special equipment and special facilities may be required for required for special catagories of children having special needs. For example,

- Children with visual impairment may require reading materials in large print or Braille.
- Hearing impaired children may require hearing aids and auditory training.
- Orthopedically handicapped children may require architectural barriers to be removed.

Objectives – We Help Children

- For all round development in their personality.
- To make familiar with their abilities and capacities.
- Guidance for parents.
- Bring educational opportunities at the door step.
- Make independence.
- Help in adjustment in environment.
- Change the attitudes towards them.
- Provide appropriate education, personal and vocational guidance.
- Utilize contribution for the progress of country.
- To be aware about their rights and facilities provide by government.

Counseling & Guidance

Psychological counseling is the use of psychological means to assist clients in addressing and overcoming issues that cause distress. Counselling / psychotherapy sessions are conducted for children, individuals, couples and families.

Child counseling

Children and young teens face emotional problems that are specific to their age group. Child psychologists strive to help their clients with issues such as depression and anxiety, sexuality concerns, school work and self-discipline, experimentation with drugs and alcohol and family crisis such as divorce or death.

Our Approach

- Create a safe & supportive atmosphere for children to express themselves and work through their problems.
- Help children communicate better, improve coping skills and assess the depth of their problems to develop solutions.
- Based on the belief that behaviour is influenced by factors such as environment, gender,race,sexual orientation,religion & culture, and each child's needs are unique.

Small Wonders Focuses on Three Major Problematic Areas in Children

Academic Problems

- Learning Disability & Difficulty
- Under achievers
- Lack of motivation
- Lack of learning skills

Behavioural Problems

- Hyperactivity (ADHD)
- Defiant & Destructive behavior
- Aggressive, behavioral

Emotional Problems

- Anxiety
- Exam fear & other phobias.
- Depression
- Shyness.
- Aggression & Outburst
